In the meeting with Jack and Dow, I thought Don said that we could get back to them in something like a week. I realize that a week is not going to happen, but I do think we're going to need to let them know what to expect before a decision, especially if we have issue with their conclusions. Do you think we could get something the first week or so in August?

Hi Dan,

Meghan has some timing questions related to 2,4-D that you may be better able to answer than me. See below.

Thanks,
Emily

Hi Emily,

Can you give me an idea of when you expect to make the decision? November is standing out in my mind, but I'm not sure if that's really the case.

We plan to get through the nozzle information as quickly as possible, but it would still be helpful to have an idea of when RD would like to have it.

Thanks!
Meghan

Hi Meghan,

Kay said that the sooner we can get it, the better since we need it before the decision.

Thanks,
Emily

Hi Meghan,

OPPIN just assigned that date and we aren't able to change it. I thought about writing one in but had no idea how long you might need to do it. Let me talk to Kay and see what she thinks about a drop dead date and I'll get back to you.

Thanks for being so on top of this!

Emily

Hi Emily,

Thanks for sending the two beans for 2,4-D. The LSDD was listed as November 30, 2013. Did you really mean 2014? Or is it a different date altogether? Just trying to get a sense of your drop dead deadline!

Thanks!

Meghan
